

provides a rock solid practice opportunity.

FungoMan®
Quality
Details

The developers of FungoMan® understand that more convenience is a big plus when it comes to freeing a coach to teach players the skills they'll need to compete effectively.

The FM-150 Automated Baseball Practice Machine was developed to suit the needs of professional, college, high school and youth leagues where every minute of practice is important.

No more coaching from behind the machine. FungoMan keeps you in the game and allows coaches the freedom to communicate and instruct, simulate previously played games, have multiple players included in one drill or create their own drills and situations specific to their team's needs.

The driving force at FungoMan is meticulous attention to product innovation based on modern coaching needs.

For more than four years, engineers at FungoMan, Inc. have researched and developed the most efficient, portable, and advanced baseball practice machine available.

Leading-edge technology has been introduced to control the motion and speed of the throwing head. A revolutionary ball-feeding system ensures perfectly placed baseballs that can fire every three seconds with speeds over 100 mph.

Zero-defect manufacturing processes at FungoMan, Inc. demand intensive employee training and comprehensive product testing procedures, rigorous rating standards, and an overall commitment to quality. These corporate values have built a reputation for exceptionally flexible, effective and innovative products for coaches and players as well.

FungoMan's Exclusive
Automated Practice
Machine Offers Precise
Ball Placement for
Coaches and Players.

FungoMan's® precision ball placement

is the optimal way for coaches to have multiple players included in one drill.

A perfect idea: an automated baseball practice machine that is easy to handle and is operated by an ingenious programmable software system. For more than four years, engineers at FungoMan, Inc. have researched and developed the most efficient and portable automated practice machine seen in baseball.

The FM-150 features a 300-ball capacity with speeds over 100 mph. Leading-edge technology has been introduced to control the motion and speed of the throwing head, along with control advances in the exclusive FungoMan ball-feeding system, to ensure perfectly placed baseballs that fire every three seconds with distances over 450 ft.

FungoMan FM-150 takes the guesswork out of coaching.

Providing coaches and players more time on fundamentals is the key reason FungoMan FM-150 was developed.

Even before you fire up the machine, every FungoMan is far ahead of the pack because it's made with FungoMan's attention to coaching details. Lightweight and easy to handle, the machine features a convenient ball hopper that holds up to 300 baseballs for continuous practice time without ball retrieval. Ground balls, fly balls, and line drives with varying spin are positioned on the field exactly where a coach desires.

FungoMan's programmable routines allow coaches and players to call up previously designed practice drills and, better yet, previously played games can be saved and replayed for game-like situations.

The heart of the product is the "Coach-Friendly" Windows® operating system.

The FungoMan FM-150 includes a color

touchscreen pocket pc with wireless remote-control capabilities. The fielding and pitching modes offer an unlimited number of balls per routine (limited only by storage disk capacity).

The unique capabilities of the FM-150 feature programmable routines that allow the user to quickly call up previously designed practice drills. Better yet, the board memory card has upgradable storage capacity.

The bottom line: Creating optimal practices benefits both coaches and players.

Ground balls, fly balls, line drives with varying top spin or backspin can now be positioned on the field wherever a coach desires.

FungoMan Quality Spotlight

Tim Hulett, Evangel Christian Academy, Head Coach

"FungoMan has revolutionized the way practices are held for Evangel Christian Academy State Champions."

Tim Hulett spent years as a professional baseball player with the Baltimore Orioles

organization. Today, as head coach of the 2006 Louisiana State Champions at Evangel Christian Academy, Tim has been a active participant in FungoMan's development and product testing.

Hulett's state high school champions have seen dramatic differences because of the teaching techniques offered by the FungoMan Automated Practice Machine. "This machine is worth its weight in gold," Hulett explains. "The precision involved with ball placement has offered my coaching staff an unlimited amount of drills that we can now use in all of the practices. Most people measure success by the results of the game. True success can be measured by the process in which you practice. If excellence in practice is prioritized, then game results will take care of themselves."

Romy Cucjen, President of FungoMan, Inc., and ex-head coach of Evangel, knows firsthand the difficulties of hitting precise grounders to infielders. "The biggest problem for any coach is that when you're hitting balls to these young players, you're really not coaching," Hulett agrees: "When you're just hitting balls, you become the machine. It is a relief to be able to coach more effectively, FungoMan has made a remarkable difference in our baseball team."
